**Summary n°2 of decisions by
monitoring and steering
committees**

In order to ensure the steering and governance of the project, 14 Steering Committees were held between 2018 and 2024, at a sufficiently regular pace to share news about the project and regional plan. In terms of governance, the Monitoring Committee met 6 times over the same period. This Committee is made up of the 130 members of the regional plan monitoring commission: local authorities, economic organisations, professional federations, government departments and associations. The members of the monitoring committee were able to appreciate the growing importance of the project in supporting plan, and many of them took part in the project's closing symposium in June 2024. The paper version of the Layman report was distributed to them on 2 December 2024.

A summary of each committee meeting was posted on the project website for wider distribution and to enable everyone to follow the progress of the project. The presentation materials and any replay are available via links in the summaries. The steering committees provided an opportunity to share experiences, with 3 or 4 associated beneficiaries talking about specific operations carried out as part of the European LIFE IP SMART WASTE project. Anne CLAUDIUS-PETIT, the regional representative responsible for monitoring plan, led 13 of these 14 committees.
